

AWARDEES

The Most STOP-Enabled Innovators of 2022 MEET THE 32

This year's 32 semifinalists come from 23 different states and really prove that innovation is alive and well in education. Micro schools, pods and hybrid learning environments almost unheard of two years ago are now being utilized by parents and educators across the nation. Traditional public schools that operate more like a charter and charters that continue to flourish outside of traditional systems, private schools serving specialized populations that are often overlooked and leaders in the ed tech space who provide remarkable tools that can be integrated into any of the other full service models we are celebrating today. Truly a remarkable group of visionaries that are transformational exemplars for all in this tumultuous 2022!

Arizona Autism Charter Schools
Statewide Charter School Network
